PROJECTS

Creative Pair **React Web Application**

Creative Pair is React Web Application built using React JS. and Tailwind CSS: www.creativepair.site .

- Creative Pair is a website built using React showcasing creative portfolios and ideas.
- Developed a modern, responsive UI with React, Tailwind CSS, and Framer Motion animations.
- Integrated dynamic routing with React Router and deployed on Netlify.
- Focused on clean design, performance optimization, and accessibility.

Care Without Fear **Android Application**

Care Without Fear is an android application built using XML and Java.

- Developed an Android application using **XML** and **Java** to digitalize healthcare and childcare services in Pakistan.
- Implemented key features including **Stripe** for secure payments, **Firebase Cloud Messaging** for instant communication, and **Google Maps** for live location tracking.
- Designed and integrated a unique **emergency alert system**, enabling both clients and caregivers (nurses, physiotherapists, and babysitters) to send instant alerts.
- Managed the project's codebase and version control using **GitHub**.
- Focused on creating a secure, accessible platform to improve the safety and efficiency of the healthcare ecosystem.

Blog Website "SCENTS" **HTML CSS JS**

Scent is a web application built using HTML, CSS, and JavaScript.

- It showcases a curated collection of scented candles and perfumes, utilizing responsive design principles to ensure optimal viewing on various devices.
- The website incorporates engaging visual elements and interactive features, such as hover effects and animations, to enhance the user experience.
- By effectively combining technical skills and aesthetic appeal, Scent provides a visually stunning and user-friendly platform for exploring fragrances.

Library Management System **C++**

- Implemented data structures (arrays, linked lists) to store and organize library data.
- Developed algorithms for searching, sorting, and managing book and member records.
- Implemented error handling and input validation to ensure data integrity.

Airport Management System **MySQL**

- Designed a relational database schema to efficiently store and retrieve airport data.

- Implemented SQL queries to perform complex data operations, such as searching, filtering, and reporting.
- Developed data normalization techniques to ensure data consistency and integrity.
- Implemented security measures to protect sensitive passenger and flight information.

Personal Portfolio **HTML CSS JS**

My personal web application portfolio is built using HTML, CSS, and JavaScript.

- It showcases my expertise and my Journey as an IT student and Oracle Technical Consultant
- The website incorporates engaging visual elements and interactive features, such as hover effects and animations, to enhance the user experience.
- By effectively combining technical skills and aesthetic appeal, My portfolio provides a detailed description of my Skills and Projects.

BotanicaOrganica **HTML CSS JS**

Scent is a web application built using HTML, CSS, and JavaScript.

- It showcases my expertise and my Journey as an IT student and Oracle Technical Consultant
- The website incorporates engaging visual elements and interactive features, such as hover effects and animations, to enhance the user experience.
- By effectively combining technical skills and aesthetic appeal, BotanicaOrganica provides a platform for plants information growth procedures and our botanist.
